

2004 added the BIKER-Alliance e.V. a new Outfit, more professionally than old persons and grow themselves from month to month at information. Top topic was up to now the article for helmet release with the forms to the medical certificate, the specialized medical certificate and a sample of a special permission.

We held a conversation with Sid, the Presi of the BIKER -Allianz e.V.

Conni/BA: How did it come to these forms to helmet release ?

Sid: I drive for nearly 4 years without helmet. After all the Stories which I can tell about the police, to wild pursuits, putting on driver and, I wanted to give all those to motorradfahrer the possibility, would like to experience this Feeling gladly without punishing notes.

Conni/BA: Pursuits ? One knows details experienced...?

Sid: Naturally! In water castle at the Inn (Bavaria, Ldk: Rose home a.d.Red) I suddenly pursued by a turning police car with siren. Thereupon I gave gas and overhauled a few cars on a closely driven on road. Bent afterwards in a one-way street off in reverse direction, then on secret means back at my residence approx.. 30 km. In the evening I got attendance of the local police of the Ldk. Ebersberg. After a short telephone call with the inspection in water castle it was then communicated to me that it concerned not driving without helmet, but around case of hit and run. In addition such a converted Bike second does not drive here in this district, which would sting one directly in the eye.

Conni/BA: Was a procedure introduced ?

Sid: Yes, after approx. 1 week called a civil servant with me, asked me again whether I would not like a confession placing. Approximately again after one week I got the second call. The Mrs., the alleged witness, could not itself any longer exactly to it errinnern to the characteristic and/or to the driver. Later I got a letter from the public prosecutor's office that the procedure was stopped because of traffic endangerment.

Conni/BA: And all this only because of driving without helmet ?

Sid: Yes ! Unbelievably which from a nullity with an irregularity of 40 DM (20 €) everything can become. I thought live in a constitutional state instead of in a banana republic. Now place yourself times to one forwards with the so-called bad, criminal-assessed Biker and Rocker.

Conni/BA: Therefore does the initiative of you come with the BIKER-Allianz ?

Sid: Yes. Rage over the way of the treatment of the police opposite me, as bad Biker. A circumstance in addition contributed, in addition, whole annoyance with the TUEV, the Gaengeleien with the entries and then the treatment using chicanery by the police, which partly doubted also still these entries. Still better, than I was stopped because of driving without light a motorcycle policeman. Then this point for point went through each entry of my registration certificate. Subsequently, I should start my Bike, because he meant, it was too loud, although the Kess Tech Pipes was registered. Unauthorized way at my gas grasp and then should I turned times so evenly beside him drive, because he wanted to make a noise measuring.

Conni/BA: How did it continue then ?

Sid: I began myself to operate in one the then largest interest agency.

Conni/BA: In which way ?

Sid: I send faxes all radio and fernsehstationen on, in order the rally to Berlin admits to make.

Conni/BA: What happened then ?

Sid: I participated in this rally 1997 with rains. Also a few man drove we from Munich over Mannheim, Westerwald, Bonn, Hamm over Hanover to Berlin. The organization was lausig in parts, sad high point was then Berlin. I communicated this in way in a reader letter of the BIKERS NEWS.

Conni/BA: Were there in addition reactions ?

Sid: Clearly, like aufgescheuchte chickens were those. None wanted, that the finger into the open wound was put and tried me, the critic, to stamp as an enemy. Statements rotated shown in the following reader letters. The high point was then the general meeting (HV) in Wieda, as I in documents of the organization closer experienced and also the whole operational sequence totally corrosive found inclusive the entire executive committee and its bad lectures.

Conni/BA: The birth of the BIKER-Allianz ?

Sid: Yes, but a statement of Doc Baumsnn was decisive, when it suggested whether I did not want to stand as a candidate for the presidency. Had to work however no support with a Mickey mouse troop.

Conni/BA: **Were there birth-sore ?**

Sid: Yes, everyone mixes annoyance again with the officials, this time from the registry office of the district court. Naja, we had also no zero-eight-fifteen-statute. One already sees that at the purpose of our articles of association. Here it goes around Biker, Rocker & Outlaws, up to Biker philosophy. Our statute in illegal way in the Bavarian Department of State of the inside skillfully for closer examination. Afterwards this woman official became abruptly ill, when our lawyer her referred to this circumstance. Starting from this time it went then after 8 months since our request much fast and we was registered. Only military courage drop beside a pointed-moderate lawyer to have had: We had to pay over **2.482,40 DM (1.221,20 € or ca. 1.400 USD)**.

Conni/BA: **Which goals have you ?**

Sid: From the own difficulties and experiences with the police and the authorities a concrete approach place to become for questions and information of any art. in addition as former Member and Secretary of a MCs and the many associated attendance at the other clubs I know various problems. , Kontrollen strengthened permission of club parties with the Rallys etc. See for this our WebSite.

Conni/BA: **What makes it differently and/or wants it differently to make ?**

Sid: We do not want to be a classical association in the conventional sense. To have to organize no long in advance planned general meetings to want to still use (waste) for it sumptuous funds from the member contributions and donations. But we do not have so far also the budgets, but we use our possibilities over the InterNet and/or locally the personal contacts.

Conni/BA: **How does the Biker have to imagine your work ?**

Sid: We dedicate our largest attention naturally our WebSite. This is primarily our platform, over we outward at the most optimal one to present itself can and contacts get. In enamels we are in contact, until in parts the USA, when we had translated our old InterNet appearance into the English. In addition by fax and/or letter, where we announce ourselves out to word and carry sowas like lobbying.

Conni/BA: **Which successes can show you ?**

Sid: An increasing attention with all, of Bikern, Rockern, institutions, media, until beyond our national borders. Likewise if we are requested by one under the large MCs to make info. conditions with one of their parties! Naturally it is clear that this everything cannot be achieved over night. We work hard, but steadily to. Otherwise we carry much out, if one considers, how little we spend on it. Ok one, we could also not do this at present.

Rage arises, if one sees which a larger organization affords: Own personnel, own office, expenditures for (extraordinary) HVs and greases incomes from the Biker Weekends. Straight ones where also allegedly as much to do want for the security of the Biker. But at the comparison of MEHRSi e.V., one sees clear that during this so-called largest interest agency too much on the paper stands, but few Angagemnt and still fewer acts behind to put. Dangerous places on Bikerstrecken in the Eifel with Unterfahrschutz at guard rails for Biker are all successes of MEHRSi e.V. Class work!!!

Conni/BA: How did the number of members develop ?

Sid: At the beginning of very good, then a depression came and then arose the grind with us, if the people forget or move their contributions to pay and no contact contacts are more present. Therefore we will change the statute and will adapt the structure, so that we differentiate into active and passive members. With the passive members the membership ends then automatically with the attitude of the contributions. Thus it gives to then carry out also for no clerical works. The active member communicates us, where and how it can bring in itself with us. We are differently, even no usual association.

Conni/BA: Otherwise still which will change in your statute ?

Sid: Yes, we become quasi non-profit that is called we become under § 10 dissolution the entire part of the property of the association to an organization to donate.

Conni/BA: May one experienced to which organization ?

Sid: Yes! To the gemeinuetzigen association, MEHRSi e.V. - security for Biker. This uses itself actively for the Unterfahrschutz at guard rails with the type Euskirchen. In the Eifel in North-Rhine/Westphalia this protection for Biker was already installed.

Conni/BA: What are in next time for plans ?

Sid: We not greatly about plans or visions will talk, but only about that here and now and which we will make at present. This we regard as Bringschuld, in order to create a basis with that it will be possible to sit a daily with the MCs at a table and decide on it, what we can still together undertake for our rights, for our scene and for the well-being of all Biker, Rocker & Outlaws.
